

ERYTHRITOL

CUTTING AGENT

.....WHAT IS IT?

It is an organic compound, a sweet substance extracted from certain algae.

It is used as a low-calorie sweetener (Stevia) as a replacement for sugar.

CUTTING AGENT IN:

It is a cheap and easily accessible cutting agent found in opioids, stimulants, and other drugs.

It comes in a white powdered form easy to mix into other drugs.

WHAT WILL IT DO?

It is used medicinally as a vasodilator.

It will provide very little effect – could elevate blood sugar if a large and consistent amount is consumed but, is unlikely.

CAN I OVERDOSE ON ERYTHRITOL?

NOT EXACTLY! You cannot overdose on Erythritol on its own however, you may overdose from drugs it is cut into. Monitor for signs of contamination.

TIPS:

- **Get your drugs tested! Start with a small amount!**
- **Do not use alone, if you are alone you can download the Lifeguard App**
- **Try to rouse the client & Call 911(administer Naloxone as it may also contain opiates)**
