

ISOTONITAZENE

OPIOID CLASS

.....WHAT IS IT?

It is an illegal benzimidazole-derived opioid pain reliever and central nervous system depressant.

It is produced primarily in China.

POTENCY:

20 x stronger than fentanyl
Also referred to as Icy, Iso, or Tony.

WHAT WILL IT DO?

Decreases alertness, pain, heart rate, body temperature and consciousness. May cause euphoria, sedation, constipation, and may lower or stop breathing.

May cause blackouts!

CAN I OVERDOSE ON ISOTONITAZENE?

YES! Isotonitazene can easily cause opioid overdoses when overused. Multiple doses of Naloxone may be needed due to potency!

SIGNS AND SYMPTOMS OF ISOTONITAZENE OVERDOSE:

- **Pale/blue skin that could be cold or clammy**
- **Decreased breathing and/or pulse**
- **Dizziness, confusion, small pupils, and difficult to wake up**

TIPS:

- **Get your drugs tested! Start with a small amount!**
- **Do not use alone, if you are alone you can download the Lifeguard App**
- **Try to rouse the client, administer Naloxone & Call 911**
