

MANNITOL

CUTTING AGENT

.....WHAT IS IT?

It is a sugar alcohol and a diuretic medication that helps get rid of fluid build up in the body. It's commonly used to reduce swelling due to fluid retention.

CUTTING AGENT IN:

Found as a cutting agent in stimulants, opioids and other street drugs.

It has anti-caking properties that help keep the drugs in a powdered form so the drugs look less cut.

WHAT WILL IT DO?

Can cause nausea, vomiting, upset stomach, electrolyte imbalance, kidney damage, confusion, dehydration, seizure, chest pain, and heart problems.

CAN I OVERDOSE ON MANNITOL?

NOT EXACTLY! Mannitol is dangerous to consume as it can cause irreversible organ damage leading to death. You may also OD from drugs it is cut into!

TIPS:

- **Get your drugs tested! Start with a small amount!**
- **Do not use alone, if you are alone you can download the Lifeguard App**
- **Try to rouse the client & Call 911(administer Naloxone as it may also contain opiates)**
