

PHENACETIN

CUTTING AGENT

.....WHAT IS IT?

It is an analgesic and fever reducer that is related to Tylenol. It is a white crystalline powder similar to cocaine!

It is used in hair dye.

CUTTING AGENT IN:

Primary found in stimulants, but also found in opioids and other street drugs as a cutting agent.

WHAT WILL IT DO?

Decreases pain, lowers body temp and causes slight numbing effects.

It was banned in Canada in the 70s since it causes permanent liver and kidney damage with long term use.

CAN I OVERDOSE ON PHENACETIN?

NOT EXACTLY! You cannot overdose on Phenacetin alone however, you could overdose from drugs that it is cut into.

TIPS:

- **Get your drugs tested! Start with a small amount!**
- **Do not use alone, if you are alone you can download the Lifeguard App**
- **Try to rouse the client & Call 911(administer Naloxone as it may also contain opiates)**
